Charlemagne Jerusalem

Manila, Philippines • jerusalemcharlemagne@gmail.com • (+63) 969-168-3923 • https://www.linkedin.com/in/charlemagne-jerusalem/

Profile

- Cybersecurity enthusiast with hands-on experience from CTFs and training platforms. Strong foundation in Web App testing, OSINT, and Network Security. Currently pursuing the **Certified Penetration Testing Specialist** certification from Hack The Box, and enhancing my code review skills. Passionate about ethical hacking and eager to apply technical skills in a real-world environment. Maintaining consistent study on platforms such as Hack The Box and TryHackMe.

Skills

- Practical Experience with Linux and Windows Operating System as well as Virtual Machine or WSL.
- Practical Experience with web proxies such as Burp Suite and OWASP ZAP. - Intercepting HTTP/HTTPS requests, Brute-forcing, and Analyzing Web Responses.
- **Competitions:** Competed and solved various Capture The Flag challenges, such as Web, OSINT, Miscellaneous, and AI/LLM
- **Technical:** OSINT, Linux, Burp Suite/ZAP, Python3, Bash Scripting, PowerShell Scripting, Troubleshooting, Tmux, VIM, AI Harness, and tinkering in every new technology I could find.

Achievements

- **3rd ASEAN Cyber Shield (ACS) Hacking Contest (2025)** - Busan, South Korea - Represented the Philippines in ACS and secured 15/20 Student Team
- **Hack4Gov NCR 2025** - Top 8 Individual Scorer - Top 12/20 Universities
- **Hack The Box University CTF 2025: Tinsel Trouble** - Secured 115/1014 Teams - Top 2 Team in Philippines
- **Hack The Box Cyber Apocalypse 2026** - The Salt Crown - Top 26 Globally - team CyberwireZ
- **Finished Achieved Top 1% on TryHackMe** - https://tryhackme.com/p/Carlomagno
- Achieved Professional Rank on Hack The Box - https://app.hackthebox.com/public/users/2135805

Projects

- Built a custom CTF lab environment using Kali Linux and Parrot OS for hands-on security practices.
- Application of AI in Cybersecurity - AI-based Spam Detection, Network Anomaly Detection, and Malware Classification.
- Finished **Web Exploitation Specialist (CWES)** Job Role Path (Hack The Box Academy) - Knowledge about known Web Vulnerabilities and OWASP Top 10.
- Finished **Junior Cybersecurity Analyst (CJCA)** Job Role Path (Hack The Box Academy) - Foundational knowledge about both offensive Penetration Testing and defensive SIEM log analysis/SOC processes.

Certifications

- **Certified Red Team Analyst (October 2025)** - Hands-on beginner-friendly offensive security certification focused on Penetration Testing topics such as Port Scanning, Web Enumeration/Exploitation, Lateral Movement, Active Directory Attacks.
- **APISec Certified Practitioner (July 2025)** - API Fundamentals, OWASP API Security, API Authentication, API Documentation and Best Practices, and Securing API Servers

Education

PHINMA Saint Jude College Manila Sampaloc, Manila - Currently 4th Year Student **2023 - Present**
Bachelor Of Science in Information Technology (BSIT)
Language: Filipino, English

Organization

- **CyberwireZ (Staff)** - A Filipino Cybersecurity community - Assisted in meetups and conferences, gaining exposure to industry practices. As a volunteer in a tech support role, I have solved various technical difficulties under pressure such as communication, presentation, and helping the host run their program smoothly.
- **Hack The Box Mentorship Program (Ongoing)** - With a goal to pursue the specific Hack The Box Certification (CPTS) together with guidance of a dedicated mentor from the industry.
- **Attended HTB Meetup Philippines** - Gained insights about the attacking cloud, blue teaming, inside of blue teaming, and how to start in cybersecurity, intro to CTF, and whitebox pentesting.
